

What is cloud computing?

What are benefits?

- Pay as you go
- benefit from massive economies of scale
- Stop guessing capacity
- Increase speed and agility
- Reduce cost saving
- No global in minutes

Benefits of services

Region Selection

- Latency
- Pricing
- Service availability
- Data compliance

Why pricing is different?
 ↳ cost of data center
 ↳ electricity
 ↳ security
 ↳ Brazil is not costly region

Availability zones

↳ data center to store data

Edge location

↳ cache data to your location
 we also called edge location

- it automatically enabled
- EC2 instance is data center
- After it will say you have to define

we need secret key and AccessKey

Service Management

- AWS Management Console
- AWS CLI (Command Line)
- AWS SDK (Software Development Kit)

[All are done by API]

Shared Responsibility Model

Both are responsible
 AWS and customers

IAM

Who can access what

Iam factory [EC2 is iam and bound to region] So EC2 is regional service

- Global
- Integrated with AWS service
- Shared access to your AWS account
